Product Description

PlusRoc DC-DC Converters are widely used in low power consumption electronics to step-down from 24/12V to 5V. The enclosure is completely sealed with epoxy resin, providing superior protection against water damage.

Main Specifications:

- IP68 Waterproof Enclosure
- Efficiency: Up to 96%
- Non-isolated
- Input voltage: DC 8-35V, (12V/24V is recommended)
- Output voltage: DC 5V
- Output current: Max. 3A
- Power rating: 15W
- Stable performance
- Operating Temperature: -30°C to 65°C (-22°F to 149°F)
- Humidity Limits: 10%-90% RH
- Size: 46mm*27mm*14mm(L*W*H)/ 1.81 inch * 1.06 inch * 0.55 inch

Package Includes:

- 1pcs DC-DC 12V/24V to 5V Converter

Jamie

Worked as intended

Reviewed in the United States on July 22, 2023

Style: Micro USB Connector **Verified Purchase**

I used this product as part of a hardwire power installation of my Ring alarm entry keypad. The wires were thinner than I expected but the Wago connectors I also bought still worked

with those wires.

reader runner

Didn't realize how convenient it is.

Reviewed in the United States on June 28, 2023

Style: Open Wire **Verified Purchase**

I love building little electronic devices and thought I had a nice setup where I could test 5v devices. But adding DC barrel jacks to the ends of this made it so easy to use that I've put my wall chargers and cables away and just use this with a 24v DC adapter. Now I only have one wire in my workspace.

Just what I needed.

Reviewed in the United States on June 29, 2023

Style: Micro USB Connector **Verified Purchase**

I bought this for a security camera that came with a solar panel I couldn't use because of the location of the camera. But I did have 12 volt power from a previous camera. This transformer worked perfectly.

Worked perfectly for a Raspberry Pi 4 with a 12 volt power source

Reviewed in the United States on May 9, 2023

Style: USB Type-C Connector **Verified Purchase**

I used the USB-C model for a Raspberry Pi 4 with a 12 volt power source. I built a small NAS (network attached storage) which uses a Raspberry Pi 4, 3.5 inch spinning hard drives, and a computer case fan. This allows me to run the Raspberry Pi with only a 12 volt power source, so all components in the NAS can use the same power source.

I haven't tested the power output, but it the Pi hasn't shown any issues when under load, so I'd say it's probably sufficient for most workloads.

Amber

Works great so far...

Reviewed in the United States on May 2, 2023

Style: USB Type-C Connector **Verified Purchase**

Paired with an "add-a-circuit" to wire into the ignition fuse. Works good so far and no more wires to the cigarette lighter.

Powering a Ubiquiti G4 Instant wireless camera

Reviewed in the United States on May 19, 2023

Style: USB Type-C Connector **Verified Purchase**

I'm using the PlusRoc Waterproof 12V/24V to 5V Converter DC-DC Step Down Module to power a Ubiquiti G4 Instant wireless camera from a 12v 20ah LifePo4 battery. It's been running for 4 days straight with no issues. The Step Down module is doing what it's supposed to do and it's not getting hot.

Wrench

Just what I needed for my bike.

Reviewed in the United States on October 26, 2022

Style: USB Type-C Connector **Verified Purchase**

I was looking for a dedicated usb-c charger for my S22 Ultra phone. I tried using a cigarette lighter adapter but it wasn't charging the phone. I really didn't want to use something like that anyway because most of them aren't water resistant/proof. This little unit was a lot smaller than I had imagined but that isn't a bad thing it's actually a plus in my case. I tested the unit before installation just to be sure it was working. I already had a small hole on my inner fairing that I used to pass the usb-c charging cable through and sealed up around the cord. On the inside of the fairing I found where I was going to mount the unit itself and I used hot glue to secure it. I did have to lengthen the positive and negative feed wires to make sure that I could reach the power source that I was going to use. I have it wired to a power source that is only active when the ignition is on. It works perfectly for what I needed it for.

plug too big and it doesn't work

Reviewed in Canada on November 11, 2022

Style: Micro USB Connector **Verified Purchase**

I have a 24V DC power source, this seemed like it would work fine to power my Wyze cams but I found the plastic plug for the micro-USB was too large to fit into the recess of the camera.

I had to whittle down the plastic part to fit into the camera only to find this thing doesn't work!
